### Procedure

- 1 Blend phase A and start heating to 75C
- 2 Cool oil phase to room temperature
- 3 Premix components of B
- 4 Add B to A while mixing
- 5 Melt C at 45C
- 6 Add C to A+B
- 7 Stir vigorously

It is an anhydrous sun care product with light and easily absorbing oils composition. It spreads evenly on the skin without tackiness and oiliness, leaving skin supple, soft and protected against UVA and UVB. Oil is enriched with Lipex PreAct, protecting against skin damage caused by sun exposure. It soothes as well skin. Lipex SheaLight is used as effective solvent of UV filters and emollient the same time. SunCare Oil SPF 30 can be used in sprayable form or with actuator, dependently on desired application form.

The information given concerning the application and product technology represents our state of knowledge and no claims are made as to its completeness. The information given does not free the user of his own responsibility for comprehensive testing before production.
