Beautifully rich and airily light, Soufflé Melt Body Cream is as delightful and surprising as its culinary namesake. The key ingredient is Lipex SMP, creating the emulsion's rigid structure that is designed to melt on the skin at first touch. The cream dissolves and glides easily over the body, leaving skin looking silky smooth and feeling deliciously soft without any residue. This formulation can also be whipped to create a new, aerated texture and makes an excellent base for developing new types of body butters, textured creams and other innovative applications.
